Portfolio: [Tyrese Muigai Professional Portfolio](#)

Professional Summary

Detail-oriented and versatile **Software Engineer** with strong experience in full-stack development, cloud platforms, and modern software architecture. Skilled in building scalable systems, designing efficient APIs, and delivering end-to-end solutions across web and backend environments. Passionate about creating high-quality software products, integrating DevOps practices, and continuously learning new technologies.

Education

Jomo Kenyatta University of Agriculture and Technology (JKUAT)

BSc. Computer Science | Year 4, Semester 1

Relevant Coursework: Machine Learning, Compiler Construction, User Interfaces Architecture, Knowledge Based Systems

Technical Skills

Programming: Python, Java, JavaScript, Bash scripting, Go, Rust

Cloud & DevOps: Google Cloud, AWS, Ansible, Docker, Kubernetes

Cybersecurity: Threat Modeling, Secure Software Development, Web Application Security, OWASP Practices

Software Development: Full-stack web development, API design, Microservices, System Architecture

Databases: MySQL, PostgreSQL, Firebase, MongoDB, Redis, SQLite

AI & Data Analysis: Machine Learning, Data Science

Key Projects

GlycoSafe – AI-Powered Diabetes Management App

Developed a web platform enabling real-time glucose monitoring, secure data analytics, and personalized AI insights. Ensured security, scalability, and reliability of the system.

SokoFresh EA - Cold Storage & Advanced Inventory Management Platform

A comprehensive Progressive Web Application that digitizes cold storage operations across multiple facilities. Built for enterprise-scale cold chain businesses, it provides real-time visibility, automated workflows, and centralized management of inventory, equipment, workforce, and logistics.

Byte Flow – Tech Solutions Startup

Co-developed cloud-driven solutions for SMEs, focusing on scalable deployments and security-focused implementations.

View all major projects at my portfolio website for full details.

Leadership & Experience

Head of Operations – Byte Flow

Managed technical operations including cloud deployments, DevOps workflows, and security compliance. Coordinated engineering resources and guided development of client software solutions.

Tech Consultant – Cybersecurity & Cloud Solutions

Provided security audits, cloud migration guidance, and infrastructure optimization for businesses. Delivered training on DevOps automation and SRE concepts.

Certifications & Training

- **AWS Cloud Architect – (Ongoing)**
 - **AWS Security Specialty / Cloud Security – (Ongoing)**
-
